

*1. Where do you come from and what do you study back home?*

I come from Lithuania. I live in Šakiai city, but I study in Vilnius, at Vilnius Gediminas Technical University of Environmental engineering.

*2. Why did you choose Slovenia as your exchange country?*

My home University Erasmus students manager offered Slovenia as an exchange country and asked to think about this option. I searched for a lot of information about Slovenia and discovered it is a very beautiful place. I also asked some friends who were in Slovenia and they told me it would be a great opportunity.

*3. What do you think of Velenje/Slovenija?*

I can say this is a very beautiful place. All the mountains around Velenje look so cool. I hope when it gets warmer, I'll be able to visit places like Postojna or the Bled castle, go to the seaside and do all the other fun things.

*4. Are you satisfied with subjects and the way your study is going?*

Almost. It is sad because I am only one erasmus and I have only consultation with professor and I don't have lectures with other students .. On the other hand, I have more time to study and more time for myself. Everything I study is very similar to my university program back home so it will be an easy transition once I return.
