

1. Where do you come from and what do you study back home?

I come from Spain where I study environmental engineering.

2. Why did you choose Slovenia as your exchange country?

It was the most suitable option for me.

3. What do you think of Velenje/Slovenija?

Slovenia is a very beautiful country. I like the way it combines various types of different landscapes.

I specially like Bled lake, it is a breathtaking view from there.

I also like walking next to the river in Ljubljana, with all the cafes, and the coast from Piran and Portorož.

I also enjoyed little trips to the mountain to walk in the snow, and to little villages.

Velenje is a very modern city, peaceful but with a good environment. It is a perfect place to enjoy the nature.

4. Are you satisfied with subjects and the way your study is going?

Yes, they were really interesting subjects, and I have learnt a lot of things.
