

Léo Van Hoeymissen

the Erasmusplus exchange student at Visoka šola za varstvo okolja
(Environmental Protection College – EPC) said:

1. Where do you come from and what do you study back home?

I'm from Lille in France and I study Chemistry: I'm in "DUT" that is 2 years degree under graduate.

2. Why did you choose Slovenia as your exchange country and why did you choose Environmental Protection College (EPC) as your exchange higher education institution?

I have chosen Slovenia because it is a country, which I didn't knew anything about and I like new experiences and discover some new culture, country, language...

I didn't choose EPC; it is a deal between my University and EPC. I'm working on the waste water treatment plant at Sostanj.

3. What do you think of Velenje/Slovenija?

Velenje is a very nice city with a lot of forest and mountain, there are a lot of very nice people and we can make everything we want here: Sport, tourism...

One of good point is that there is the free bus, which is very useful.

Slovenia is a very nice country with very nice cities and very nice scenery.

4. What do you think of EPC?

EPC is a very nice and modern school with a lot of very nice teachers and person.

5. Are you satisfied with the way your practical training is going?

Yes, my training is very interesting and we meet very nice people. I think I will learn a lot of knowledge, which will be very useful for my studies later.
