

Internship in forest and moose project Evenstad, Norway Inland Norway University of Applied Sciences (INN)

Dear student!

As you might know we have in previous years welcomed some of students from Environmental Protection College, Velenje, Slovenia, for an internship to get a hands on experience with research work within the field of Applied Ecology.

For this spring (May – June) we have several seats available for a Forest and Moose project. See attachment for more details. The internship will be under the course Practice in Applied Ecology (<https://eng.inn.no/studies/catalogue/ecology-agriculture-and-biotechnology/practice-in-applied-ecology>) and for a two months stay the students will get 15 ECTS.

Med vennlig hilsen / Kind regards

Elisabeth Riseth
