

Wei Sean Chew

the Erasmusplus exchange student at Visoka šola za varstvo okolja
(Environmental Protection College – EPC) said:

1. Where do you come from and what do you study back home?

I am a Malaysian student who currently studies chemistry in IUT A de Lille 1 at Lille, France.

2. Why did you choose Slovenia as your exchange country and why did you choose Environmental Protection College (EPC) as your exchange higher education institution?

I choose Slovenia as my exchange country because I am someone who always seek to explore new places for a better understanding of their culture. Slovenia is an interesting country with lots of nature beauty, so I think it would be fun to do my training course here.

I choose EPC because I would like to learn more on the environment and understand how to conserve and preserve our environment for our future generation.

3. What do you think of Velenje/Slovenija?

Velenje is a small town where people leads a calm and cheerful lifestyle. The people greet us when we meet each other and it is kind of polite in my opinion. I like this place because it is peaceful to live near to the mountain and forest. The air is fresh as well.

4. What do you think of EPC?

I think EPC is a college with great facilities, great professors and also supportive students. They are helpful and it would be an ideal place of study.
