

Dear exchange student!

We kindly please you to fill in the questionnaire and send it back to us by email as soon as possible.

We post your answers in our website to promote student exchange mobility, if you agree. If you don't agree please let us know!

Thank you very much in advance!

- 1. Where do you come from and what do you study back home?**
- 2. Why did you choose Slovenia as your exchange country and why did you choose Environmental Protection College (EPC) as your exchange higher education institution?**
- 3. What do you think of Velenje/Slovenija?**
- 4. What do you think of your host institution – Environmental Protection College (EPC)?**
- 5. Are you satisfied with the way your study at the EPC is going?**
- 6. What are your main professional interests in and how do you see your future career?**

- 1- I come from Naples, Italy, and I study environmental engineering.
- 2- I chose Slovenia for my exchange because it is a country that fascinates me. Slovenia is full of fantastic natural landscapes, and is at the heart of Europe in a favorable position. I chose the environmental protection college to the curriculum they offer and for their attention to the most significant environmental problems.
- 3- Velenje is lovely and it is a city that offers the most fantastic views with its lakes and its nature trails. It is a city full of young people and there are all of the attractions to be able to enjoy life.
- 4- The environmental protection college is very well organized, the classrooms are magnificent and there are areas to study. It is located in the center of Velenje in a very nice area near a river and surrounded by greenery. It exudes a nice atmosphere.
- 5- I am very happy with my studies at EPC I am followed by professors who are very kind and helpful and they put me in a position to do my best with the study.
- 6- My main interests in the work are renewable energy such as solar and wind energy. in my future I see myself in a big company that deals with solar panels and wind turbines to produce clean energy.
